

AC41004 Team Project Feedback Form

What 3 things did you like about the Team Project Module?

1. The lectures on presenting were useful.
2. Being able to have free reign on designing the software and development methods we could chose.
3. A good chance to practice all that we have done over the three years at University.

What 3 things would you change (and in what way)?

1. Choose our own groups. Whilst we realise that you are trying to create a workplace environment. However, when members of the group do little or no work you don't get as much done if you had all members working together. In the real world you get sacked.
2. Not enough time to plan, implement, and produce a full system.
3. N/A.

Any additional recommendations / comments?

N/A

All replies, signed/not, to either

1. jarnott@computing.dundee.ac.uk or
2. Print-out and post in "John Arnott" in-tray on level 1
