That's great.

Many thanks,

Team 1

Dear Kari

sorry for the delay in replying - see below. Let me know if any further clarification needed.

Lesley

We have listed the requirements we believe you want in order of priority:

1) As a stakeholder I want a searchable glossary for leaf, nutrient information and tubers symptoms which when a symptom is selected leads to a further information page for each symptom that contains six images, basic facts, diagnostics and control information. **Ans: Broadly yes but the three top pages are leaf (incl disease and nutrient deficiency symptoms), insect pests and tubers**

2) As a stakeholder I want an expert system ( NHS 24 like ) that will ask a series of questions and help diagnose possible symptoms for potato disease, **Ans: Not necessarily ask q's but I want a decision support tool that will allow me to compare symptoms of plants growing in the field with images that allow me to make decision about what may be causing my problem and then guide to other pages with info on what to do about it**

3) As a stakeholder I want two videos to show the two field tests videos in the application.

4) As a stakeholder I want to be able to zoom into the images.

5) As a stakeholder I want to be able to add new glossary information via the phone or a website.

6) As a stakeholder I want to be able to share the images with others to gain insight from others.

**YES**

Can you confirm these requirements are correct and are in right priority ? **yes**

We plan on taking an Agile/Iterative approach which is a software development process where you take one or two top priority requirements, develop them and then go on to develop the next requirement until you reach the project deadline. We would like to promise to complete the two top priority requirements by the end of the project and hope to add the rest iteratively if we have time during the project. This enables us to be realistic and not over promise to the client and disappoint or try to do too much and not have anything complete. Would you be happy with us taking this approach ?**ok**

Many thanks in advance,

Team 1

Dear Kari

Someone would be available next Wednesday at 11 am for 30 mins. If you guys can come out here.

In reply to q's

We also just wanted to confirm the requirements we agreed from the meeting yesterday to achieve over the next week:

- 1) Changes based on feedback from meeting
- 2) Ability to pinch zoom on images [YES](#)
- 3) Diagnostic expert system ( Answering questions and receiving diagnosis suggestion ) completed.
- 4) A mock website with possibility to update phone if we have time. [YES please](#)
